According to our (Global Info Research) latest study, the global Two-Fluid Air Atomizing Nozzle market size was valued at US\$ 126 million in 2024 and is forecast to a readjusted size of USD 160 million by 2031 with a CAGR of 3.6% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Two-fluid air atomizing nozzle is a nozzle that uses compressed air and liquid to atomize liquid into tiny water droplets. The nozzle produces fine and uniform mist spray through the synergistic effect of air and liquid, and is often used in cooling, humidification, spraying, cleaning and other fields. Compared with single liquid nozzles, two-fluid nozzles can achieve more efficient atomization effect, reduce droplet size and improve system performance. It is widely used in industrial cooling, environmental control, agricultural irrigation and other occasions.
