Abstracts

The global Two-part Acrylic Structural Adhesive market size is expected to reach \$ 319 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

Acrylic AB structural adhesives refer to two-component structural adhesives that require mixing in a prescribed ratio prior to use and undergo a curing reaction at room temperature or under specified conditions. Upon curing, they form a high-strength, durable bond layer capable of withstanding significant structural loads. Typically based on acrylic or methyl methacrylate systems, these adhesives are primarily utilized for the structural bonding of engineering materials such as metals, plastics, and composite materials. In 2025, the global production volume of acrylic AB structural adhesives was 4,500 tons, with an average price of \$48 per kilogram and a primary industry gross margin ranging from approximately 30% to 35%.
