## Abstracts

According to our (Global Info Research) latest study, the global Two-Way SMS Service market size was valued at US\$ 12677 million in 2025 and is forecast to a readjusted size of US\$ 21922 million by 2032 with a CAGR of 8.1% during review period.

Two-way SMS Service is a professional communication service that enables mutual message transmission between a sender (such as enterprises, organizations or individuals) and a recipient via mobile network, supporting both outgoing messages from the service provider to the recipient and incoming messages from the recipient to the service provider. It integrates message sending, receiving, storage, and management functions, with features of real-time delivery, high reach rate, and low cost, and is widely used to realize interactive communication without relying on complex network environments.

Demand for Two-way SMS Service is driven by the need for efficient, direct interactive communication in various fields, the increasing demand for customer engagement and service optimization of enterprises, the popularity of mobile devices, and the demand for simple and low-cost communication solutions for small and medium-sized organizations. Business opportunities lie in the development of customized interactive modules, integration with enterprise customer management systems, expansion into emerging fields requiring real-time interaction, and the provision of value-added services such as message encryption, automatic reply, and data statistics to meet diverse user needs.
