According to our (Global Info Research) latest study, the global Two-Wheeler Keyless Entry System market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Keyless entry systems eliminate the use of mechanical keys. Thus, they offer better security and convenience to two-wheeler owners. These systems replace the key with an ignition button and conventional ignition lock with a transponder fob (with a flip-out key for backup). In addition, keyless entry systems allow the locking and unlocking of the steering lock and fuel filler flap. In some models, such as BMW and BMW GT/GTL, the storage compartments locks are controlled by the transponder.

The demand for premium motorcycles is increasing in APAC due to the rising number of HNWIs. This is encouraging the international premium motorcycle OEMs to shift their production facilities in the developing markets in APAC. Vehicles such as KTM is successfully capturing the market. The rising sales volume of luxury motorcycles in APAC is estimated to be one of the major factors that will have a positive impact on the growth of the market. The rising focus on the production of units suitable for export and the improvement of the quality of indigenous motorcycle models are driving motorcycle OEMs to enter into partnerships with international motorcycle OEMs, such as BMW, MV Agusta, and Harley-Davidson. This further boost the demand for premium motorcycles and two-wheeler keyless entry systems.
