Abstracts

According to our (Global Info Research) latest study, the global Two-Wheeler Spark Plugs market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A spark plug is a device used to transfer electric current to the combustion chamber to ignite the air-fuel mixture with an electric spark.

The increase in personal mobility is one of the primary drivers for market growth. The rising need for personal mobility leads to the growth in sales of two-wheelers. However, the increasing traffic congestion has curbed the personal mobility due to the decrease in the speed of traffic. It has been observed that in cities like Beijing in China and Bengaluru in India, the traffic speeds are about 8 miles/ hour during peak hours. To counter the long waiting hours in traffic, the two-wheeler scooter segment is the preferred option as they offer more flexibility and personal mobility on congested roads. This increased popularity of the scooter segment will lead to a significant increase in its sales, consecutively driving the demand for two-wheeler spark plugs during the forecasted period.
