Abstracts

According to our (Global Info Research) latest study, the global Type-C Conductive Bulk Bag market size was valued at US\$ 1853 million in 2025 and is forecast to a readjusted size of US\$ 2781 million by 2032 with a CAGR of 6.0% during review period.

In 2025, global production of Type-C conductive bulk bags reached 316 million units, with an estimated average selling price of US\$5.7 per bag. Type-C conductive FIBCs are flexible medium-sized bulk containers made by interweaving conductive yarns, filaments, or strips into a PP woven base fabric and conducting static electricity to the ground during filling, handling, and unloading through a grounding point. The key difference is that they must be grounded, unlike ordinary Type A ton bags, Type B ton bags with low breakdown voltage but no conductivity, and Type D static dissipation ton bags that do not rely on external grounding. Type C is defined as being made of conductive fabric/plastic sheet or interwoven conductive wire/fiber and requires grounding during loading and unloading. Applications are concentrated in chemical powders, fine chemicals, pharmaceutical intermediates, resin plastics, pigments and dyes, metal powders, lithium battery materials, agrochemicals, food additives, and filling and unloading scenarios where there are combustible dust, flammable vapors, or solvents. The upstream of the industry chain mainly includes polypropylene resin, PP flat yarn, conductive yarn/carbon fiber/metal conductive yarn, antistatic agents, UV stabilizers, PE/aluminum foil/EVOH inner lining film, sewing thread, slings, labels, and grounding point accessories; the midstream includes drawing, circular/plain weaving, coating, cutting, sewing, conductive network connection, inner lining composite, antistatic/conductivity performance testing, and customer customization; the downstream includes chemicals, pharmaceuticals, plastics, minerals, food powders, lithium battery materials, hazardous chemical storage, and international logistics. Gross

profit margin is approximately 20%?35%.
