Abstracts

According to our (Global Info Research) latest study, the global Type-D Conductive Bulk Bag market size was valued at US\$ 493 million in 2025 and is forecast to a readjusted size of US\$ 792 million by 2032 with a CAGR of 7.1% during review period.

In 2025, global production of Type-D conductive bulk bags reached 51 million units, with an estimated average selling price of US\$9.4 per unit. Type-D conductive FIBCs utilize special electrostatic dissipative base fabrics, quasi-conductive yarns, antistatic yarns, or dedicated electrostatic protection materials such as CROHMIQ to safely release static electricity generated during filling, handling, and unloading in a low-energy manner, preventing ignition sparks, brush discharges, and propagating brush discharges. Type-D bags do not require grounding, making them more suitable for high-risk powder packaging scenarios with unstable grounding conditions, frequent mobile operations, potential operator negligence in grounding, or where minimizing human error is desired. Their main applications are concentrated on packaging flammable powders, combustible dusts, chemical powders, resins, plastic particles, pigments, pharmaceutical raw materials, agrochemicals, food additives, metal powders, lithium battery materials, and bulk materials in environments containing flammable gases, vapors, or solvents. They are particularly suitable for filling lines where grounding reliability cannot be reliably guaranteed, mobile unloading scenarios, and cross-regional logistics. The upstream of the industry chain mainly includes polypropylene resin, PP flat yarn, static dissipative yarn, quasi-conductive yarn, CROHMIQ-type special base fabric, antistatic additives, UV stabilizers, PE/aluminum foil/EVOH inner lining film, straps, sewing thread, labels, and testing consumables; the midstream includes drawing, weaving, coating, cutting, sewing, inner lining lamination, static performance testing, clean packaging, and customer customization; the downstream mainly includes

chemicals, pharmaceuticals, food powders, plastic resins, lithium battery materials, agrochemicals, mineral powders, and hazardous chemical logistics. Gross profit margins range from approximately 25% to 45%.
