The global U-shaped Garage Seal market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

A U-shaped garage seal, also known as a bottom weather seal, is a type of weatherstripping designed to seal the gap between the bottom of a garage door and the floor. It typically has a U-shaped profile, allowing it to fit snugly around the bottom edge of the garage door. The primary purpose of this seal is to prevent drafts, dust, insects, and water from entering the garage space. It helps maintain a more controlled environment inside the garage, providing insulation and protection against external elements. The U-shaped design creates a barrier that helps improve energy efficiency and keeps the garage interior more comfortable.
