According to our (Global Info Research) latest study, the global UAV Flight Training and Simulation market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Unmanned aerial system (UAV) flight training and simulation can be defined as a simulation of the operation of a real-world system or process related with UAV flight training. These systems simplify pilots to train in an artificial environment that prepare them to obtain skillsets required to gain hands-on experience for real-time situations without the risks associated with actual flights.

Rise in need for virtual simulation solutions, growth in need for commercial drone market, and increased application areas for drones drive the global UAV flight training and simulation market. However, increased adoption of automated UAVs, lack of awareness among end-users, and limited forward field-of-view impedes the market growth. Supportive regulatory framework offers a major opportunity for market expansion.
