UAV Image Transmission Equipment is a type of equipment that can transmit images or image-related data from a UAV to a ground station or another device. It usually consists of a camera, a transmitter, a receiver, and an antenna. The camera captures images from the UAV's perspective, the transmitter encodes and modulates the image data and sends it through the antenna, the receiver demodulates and decodes the image data and displays it on a screen or stores it in a memory device. UAV Image Transmission Equipment can enable real-time or near-real-time communication and monitoring of the UAV's activities and surroundings.
