Abstracts

According to our (Global Info Research) latest study, the global UAV LiDAR market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

With innovation in UAV technology, there has been a shift from the use of high-cost fixed-wing aircraft LiDAR to low-cost and more efficient UAV LiDAR. The LiDAR sensors on UAVs are able to capture images, which was previously accomplished using a crew and heavy LiDAR sensors on aircraft. A LiDAR sensor mounted on a UAV, along with sophisticated software, can quickly upload LiDAR images to the cloud. Therefore, effective decisions can be made by stakeholders and relevant parties in a short span of time.
