UHF RFID washable tag is a durable smart tag using UHF radio frequency identification technology. It is mainly used to realize the full-process digital management of linens, work clothes and other fabrics. The labels are usually waterproof, corrosion-resistant, resistant to high-temperature steam ironing, and can be washed repeatedly for hundreds of times. They can operate stably for a long time under harsh industrial washing and disinfection conditions. By using them in conjunction with UHF RFID reading and writing equipment, they can achieve automatic identification of fabrics, inventory tracking, service life statistics, and anti-loss management, greatly improving the management efficiency and transparency of the laundry industry.
