Abstracts

According to our (Global Info Research) latest study, the global UHMWPE Rope market size was valued at US\$ 207 million in 2024 and is forecast to a readjusted size of USD 321 million by 2031 with a CAGR of 6.5% during review period.

UHMWPE is comprised of extremely long molecules (chains) of polyethylene oriented in the same direction, which results in large areas of overlap between the molecules. This overlap greatly increases the bond between the molecules and thereby, the strength of the fibre is greatly increased. When rope is manufactured using this fibre, extremely high strengths can be achieved. Dyneema® is the premium brand for Ultra-High Molecular Weight Polyethylene fibre.

UHMWPE (Ultra High Molecular Weight PolyEthylene), also known as HMPE (High Modulus PolyEthylene) or HPPE (High Performance PolyEthylene), is a polyolefin resin of very high molecular weight (mass) usually between 2 and 6 million g/mol with extremely long chains produced by gel spinning (wet or dry methods). The longer chain serves to transfer load more effectively to the polymer backbone by strengthening intermolecular interactions. This results in a very tough material, with the highest impact strength of any thermoplastic presently made.

UHMWPE is odorless, tasteless, and nontoxic. It is highly resistant to corrosive chemicals except oxidizing acids, has extremely low moisture absorption (Hydrophobic), very low coefficient of friction, self-lubricating and highly resistant to abrasion, in some forms being 15 times more resistant to abrasion than carbon steel. Its coefficient of friction is significantly lower than that of nylon and acetal, and is comparable to that of polytetrafluoroethylene (PTFE, Teflon), but UHMWPE has better abrasion resistance than PTFE. UHMWPE material floats in water thus gaining another advantage over

many other materials such as Polyester, Nylon, Aramids and LCP.

UHMWPE ropes are increasingly replacing steel and conventional fibers in the shipping and offshore businesses of oil & gas, aquaculture, wind mills and cables and lately, experimentally, in ships' cranes. These high performance ropes are stronger than steel and ~1/8 of the weight of comparable steel wires.

Global UHMWPE rope main players are Lankhorst(WireCo), Samson, Bridon, etc. Global top 5 manufacturers hold a share about 44%. Asia-Pacific is the largest market, with a share over 38%. In terms of product, 12 strand is the largest segment, with a share over 48%. And in terms of application, the largest application is aviation and military.
