Abstracts

The global UHPC Curtain Wall market size is expected to reach \$ 624 million by 2032, rising at a market growth of 10.4% CAGR during the forecast period (2026-2032).

In 2025, the global sales volume of UHPC Curtain Wall was approximately 1.96 million square meters, with a mainstream ex-works average price of around USD 155 per square meter. The gross margin of major manufacturers in the industry was approximately 28%?42%.

UHPC Curtain Wall refers to a type of curtain wall product that uses UHPC precast panels or decorative components as building facade materials, providing enclosure, protection, and decorative functions. Its material system features high strength, high toughness, low porosity, and excellent durability, enabling strong load-bearing and crack-resistant performance at relatively thin thicknesses. It also offers good resistance to freeze-thaw cycles, chloride ion penetration, weathering, and outdoor exposure. Compared with ordinary concrete panels, GRC panels, stone curtain walls, and metal panels, UHPC Curtain Wall is better suited to modern architectural requirements for lightweight design, long service life, complex geometry, and high-quality facade appearance.

The upstream of UHPC Curtain Wall mainly includes cement, silica fume, quartz sand, mineral admixture, high-performance water reducer, steel fiber or organic fiber, pigment, mold, metal connector, and keel system. The midstream includes UHPC mix design, mixing, casting or spray forming, curing, surface treatment, back-attached connector processing, and curtain wall system integration. The downstream mainly serves commercial building, industrial building, residential building, and other building project, where it is used for facade enclosure, decoration, protection, and building envelope

renovation. Its core value lies in using high-performance cement-based material to achieve lighter, thinner, more durable, and more complex architectural facade expression.

This report studies the global UHPC Curtain Wall production, demand, key manufacturers, and key regions.
