Abstracts

The global UHV AC Transformers market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

UHV AC converters refer to 1000kV class transformers, which are divided into two types: step-up and step-down. Step-up transformers boost electricity from low voltage to high voltage, and then send it to distant places through transmission lines. The step-down transformer reduces the power from high voltage to low voltage, and then the distribution line supplies power to nearby or relatively nearby lines.

This report studies the global UHV AC Transformers production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for UHV AC Transformers, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
