Abstracts

According to our (Global Info Research) latest study, the global UHV Transformers market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

UHV transformers refer to 1000kV class transformers, which are divided into two types: step-up and step-down. Step-up transformers step up electricity from low voltage to high voltage, and then send it to distant places through transmission lines. The step-down transformer reduces the power from high voltage to low voltage, and then the distribution line supplies power to nearby or relatively nearby lines.
