Global UKAS Temperature Calibration Services Market 2026 by Company, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/G1B8DF2625E9EN.html
Date: November 2026
Pages: 217
Price: US$ 3,480.00 (Single User License)
ID: G1B8DF2625E9EN

Abstracts

According to our (Global Info Research) latest study, the global UKAS Temperature Calibration Services market size was valued at US$ 107 million in 2025 and is forecast to a readjusted size of US$ 152 million by 2032 with a CAGR of 5.1% during review period.

UKAS temperature calibration services refer to professional metrological services provided by UKAS-accredited laboratories within their valid accreditation scope. These services include value comparison, calibration, measurement uncertainty assessment, and issuance of calibration results for temperature measuring instruments, temperature sensors, temperature sources, and temperature control equipment. This project focuses on the calibration activities of physical temperature values, primarily including platinum resistance thermometers, SPRTs, PRTs, RTDs, thermocouples, electronic thermometers, temperature probes, data loggers, temperature transmitters, liquid thermometers, dry-block furnaces, constant-temperature baths, furnace bodies, infrared and radiation thermometers, as well as temperature mapping for environmental chambers, incubators, refrigerators, freezers, sterilizers, and other temperature-controlled equipment within the corresponding UKAS accreditation scope.

Key Findings

Fixed-point and comparison calibration form the two core technical routes for UKAS Temperature Calibration Services

The -200°C to 850°C range forms the principal conventional calibration band defined in

+357 96 030922
info@marketpublishers.com

this study

Calibration below -200°C or above 1800°C represents a specialized extreme-temperature service segment

Reference Standard Calibration carries higher traceability and metrological requirements than routine Working Instrument Calibration

The competitive scope comprises 33 studied providers across metrology networks, specialist laboratories and instrument-linked service organizations

Market Trends

UKAS Temperature Calibration Services are developing from stand-alone periodic calibration toward integrated measurement-assurance programs combining lower uncertainty, broader accredited scope, laboratory and on-site execution, digital certificates, calibration history and centralized asset management. Comparison calibration remains central to high-volume industrial work because resistance thermometers, thermocouples, probes, indicators and loggers can be processed efficiently in stable baths, furnaces and dry blocks, while fixed-point calibration retains an important role in higher-order standards and dissemination of ITS-90. NPL provides UKAS-accredited fixed-point calibration from cryogenic reference points through high-temperature metal and metal-carbon fixed points, and its standard platinum resistance thermometer services combine fixed-point and comparison approaches depending on instrument construction and required accuracy. At the same time, customers increasingly expect calibration providers to handle complete measurement systems, environmental chambers and installed equipment with reduced downtime. Digital test-equipment management, automated certificate generation and risk-based calibration intervals are therefore becoming important extensions of traditional laboratory competence, shifting competition toward lifecycle measurement support.

Market Dynamics

Drivers

Demand for UKAS Temperature Calibration Services is fundamentally supported by the need for accurate, traceable and auditable temperature measurement across quality-critical operations. UKAS states that ISO/IEC 17025 calibration accreditation provides

+357 96 030922
info@marketpublishers.com

confidence in measurement comparability, traceability and accuracy, with temperature explicitly covered within the metrology accreditation framework. Industrial users require recurring calibration for process sensors, furnaces, ovens, environmental equipment and production instrumentation; Aerospace applications place strong emphasis on thermal processing, environmental qualification and component testing; Pharmaceuticals and Biotechnology depend on controlled temperature measurement across laboratories, manufacturing, storage, sterilization and validation activities. Increasing sensor density and automated monitoring also expand the number of temperature points subject to periodic calibration. As quality systems become more data-driven, customers increasingly evaluate service providers on accredited scope, uncertainty, turnaround, on-site capability, multi-site consistency and the ability to manage large instrument populations.

Restraints

The market is constrained by the capital intensity and operational complexity required to maintain broad temperature capability. Comparison calibration requires highly stable baths, dry blocks, furnaces, cryogenic systems, reference thermometers and electrical measurement equipment, while each calibration point requires adequate thermal stabilization and control of immersion, gradients and heat-transfer effects. Fixed-point calibration requires even more specialized cells, high-purity materials, controlled furnaces and experienced metrology personnel. Extreme-temperature capability introduces further barriers: deep-cryogenic calibration depends on specialized low-temperature infrastructure, while temperatures above 1800°C increasingly require radiation thermometry, blackbody sources and high-temperature fixed points. NPL maintains high-temperature radiation reference points extending well beyond 1800°C, illustrating the specialized infrastructure required for this part of the market. These technical requirements raise fixed costs, limit laboratory throughput and make it difficult for smaller providers to economically maintain very broad accredited scopes.

Opportunities

The most attractive opportunities lie in Reference Standard Calibration, extreme-temperature services, on-site calibration and integrated calibration-management outsourcing. Reference thermometers and transfer standards require lower uncertainty, more rigorous traceability and stronger control of calibration methodology, creating a higher-value service layer around fixed points and precision comparison. The <-200°C or >1800°C range provides additional differentiation for laboratories capable of

+357 96 030922
info@marketpublishers.com

supporting cryogenic systems or high-temperature radiation thermometry. On-site services represent another important opportunity because large industrial systems, environmental equipment and process installations may be costly or impractical to remove from operation. WIKA's UK operations offer laboratory and on-site UKAS temperature calibration, while Testo Industrial Services combines accredited temperature calibration with equipment-management services and a broad group-wide portfolio of accredited procedures. Digital certificates, automated recalibration scheduling and consolidated multi-site asset histories can further increase customer retention and convert individual calibration transactions into recurring measurement-management relationships.

Challenges

The central industry challenge is maintaining technically defensible uncertainty and traceability across a highly heterogeneous installed base while customers simultaneously demand shorter lead times and lower lifecycle cost. Platinum resistance thermometers, thermocouples, infrared instruments, data loggers and complete temperature systems exhibit different sources of measurement error, including drift, inhomogeneity, immersion effects, thermal gradients, reference instability and electrical measurement uncertainty. UKAS also maintains dedicated guidance on temperature-measurement traceability, reflecting the importance of correctly managing reference thermometers, thermocouples and radiation thermometers within accredited calibration systems. Reference Standard Calibration requires particularly strong technical competence and uncertainty evaluation, while Working Instrument Calibration requires scale, automation and efficient batch processing. Providers must therefore balance metrology depth with throughput, technician availability, equipment utilization, geographic coverage and digital workflow. Routine comparison calibration also faces pricing pressure, making differentiated scope, extreme-temperature capability, industry expertise and service responsiveness increasingly important to sustainable positioning.

Value Chain Analysis

The upstream value chain for UKAS Temperature Calibration Services comprises national temperature standards, ITS-90 fixed-point cells, standard platinum resistance thermometers, reference thermocouples, radiation thermometers, precision resistance bridges, reference electrical instrumentation, stirred liquid baths, dry-block calibrators, furnaces, cryogenic equipment, blackbody sources, data-acquisition systems and calibration software. These assets form the physical and metrological foundation of

+357 96 030922
info@marketpublishers.com

traceability. NPL's UKAS scope illustrates this hierarchy: standard platinum resistance thermometers may be calibrated at ITS-90 fixed points or by comparison with reference thermometers, while high-temperature thermocouples use conventional ITS-90 fixed points, metal-carbon eutectic points and other specialized techniques.

The core service stage converts these standards into commercial value through instrument identification, inspection, stabilization, generation or realization of calibration temperatures, reference comparison, correction calculation, uncertainty evaluation, adjustment where applicable, certificate preparation and technical review. Value increases with lower uncertainty, wider accredited range, capability for difficult sensor geometries, fixed-point expertise, rapid turnaround and on-site execution. Downstream Industrial, Aerospace, Pharmaceuticals, Biotechnology and Other users apply calibration results to process control, validation, equipment qualification, product testing, quality assurance and audit documentation. Because temperature instruments drift during use and remain embedded throughout production and laboratory systems, periodic recalibration creates recurring service demand, while digital asset management increasingly adds an ongoing service layer beyond individual calibration events.

Segment Insights

By core calibration method, Comparison Temperature Calibration Services constitute the broad operational base of the market. They allow large numbers of working instruments—including resistance sensors, thermocouples, indicators, probes and data loggers—to be calibrated against traceable reference standards in controlled liquid baths, dry blocks or furnaces. The method provides flexibility across instrument types and calibration points and is therefore closely aligned with routine industrial calibration. Fixed-point Temperature Calibration Services represent a more specialized metrological tier, using reproducible phase-transition temperatures to establish high-quality reference points and support calibration of standard thermometers. NPL's UKAS-accredited fixed-point capability covers multiple ITS-90 points and high-temperature eutectic points, while Isothermal Technology's temperature-calibration equipment supports both comparison and fixed-point approaches.

By temperature range, -200°C–850°C constitutes the core conventional band used in this study and covers a broad spectrum of industrial resistance thermometers, thermocouples and electronic instruments. The <-200°C or >1800°C segment is technically more specialized, requiring cryogenic or high-temperature radiometric capability and creating stronger technical differentiation. By calibration object, Working Instrument Calibration is characterized by larger instrument populations, recurring

+357 96 030922
info@marketpublishers.com

calibration cycles and operational efficiency requirements, while Reference Standard Calibration places greater emphasis on uncertainty, stability, fixed-point capability and the integrity of the traceability chain.

Downstream Market Opportunities

Industrial applications provide a broad recurring demand base for UKAS Temperature Calibration Services because temperature is embedded in manufacturing, heat treatment, environmental control, process automation, laboratories and equipment maintenance. Aerospace demand is more technically intensive, with calibration supporting thermal processing, materials testing, engine-related measurements and environmental qualification. Pharmaceuticals and Biotechnology create particularly quality-sensitive opportunities through laboratory instruments, incubators, refrigerators, freezers, sterilization equipment, controlled manufacturing environments and research systems, where temperature records are closely linked to validation and quality management. Application-focused providers such as Don Whitley Scientific, LTE Scientific, Labcold and Priorclave connect calibration requirements with laboratory, incubation, refrigeration and sterilization equipment, while broader metrology providers can manage mixed fleets across multiple facilities. The higher-value opportunity is therefore expanding from single-instrument calibration toward coordinated management of complete temperature-measurement systems, including scheduled recalibration, on-site work, digital documentation and multi-site asset control.

Regional Insights

The United Kingdom represents the central market and accreditation base for UKAS Temperature Calibration Services. UKAS is the UK's national accreditation body and defines accredited calibration scopes under ISO/IEC 17025, while NPL provides the national temperature-measurement infrastructure and maintains UKAS-accredited capabilities across contact thermometry, fixed points and non-contact temperature measurement. The UK market also has a dense structure of multinational laboratories, instrument-linked calibration providers and independent regional specialists, supporting Industrial, Aerospace, Pharmaceuticals and Biotechnology customers with laboratory and on-site services. The competitive advantage of UK-based providers increasingly depends on proximity, turnaround, technical range and the ability to combine multiple calibration disciplines within a single service relationship.

International demand is linked primarily to multinational quality systems, cross-border

+357 96 030922
info@marketpublishers.com

manufacturing and customers requiring calibration results connected to UKAS-accredited measurement chains. Continental Europe contributes significant service capability through multinational calibration and instrumentation groups, while Asia-Pacific combines expanding industrial and life-science measurement requirements with stronger local metrology infrastructure. The studied market includes Centre Testing International Group Co., Ltd. and GRG Metrology & Test Group Co., Ltd. in China, together with YAMARI INDUSTRIES, CHINO Corporation and RKC Instrument in Japan. Regional opportunities center on locally available technical support, shorter turnaround, internationally aligned quality documentation and coordination between domestic calibration resources and UKAS-related customer requirements.

Competitive Landscape Analysis

The UKAS Temperature Calibration Services competitive landscape combines national metrology infrastructure, multinational calibration networks, measurement-instrument groups, application-specialist equipment companies and independent laboratories. NPL Management Ltd occupies a distinctive technical position through national temperature standards, ITS-90 fixed points and UKAS-accredited contact and non-contact thermometry, while Trescal and NMi Group participate through broader metrology and calibration-service infrastructures. Fortive Corporation, Testo SE & Co. KGaA, WIKA Group and AMETEK, Inc. combine strong measurement-instrument ecosystems with calibration-related technical capabilities, while Isothermal Technology Limited has a particularly strong position around fixed-point systems, calibration furnaces, baths, dry blocks and reference thermometry. UKAS-accredited temperature services within the wider WIKA organization include laboratory and on-site capabilities, and Trescal operates multiple UK laboratories with accredited temperature scopes. Absolute Calibration Limited, Southern Calibration Laboratories Limited, TMS Europe Ltd, Sensing Devices Ltd, Scotia Instrumentation Ltd, Tek Troniks Limited, Contronics Limited, BSRIA Limited, InCal Site Solutions Limited, Thermosense Limited, PreSet Calibration Services Limited, TechniVal Ltd, Calcert Instruments Ltd, Pendragon Scientific Ltd and Qrometric Ltd strengthen the specialist and regional laboratory layer. Don Whitley Scientific Limited, LTE Scientific Ltd, Klipspringer Ltd, Labcold Limited and Priorclave Ltd bring application-oriented capabilities associated with laboratory, pharmaceutical and life-science environments. Centre Testing International Group Co., Ltd. and GRG Metrology & Test Group Co., Ltd. broaden the competitive footprint in China, while YAMARI INDUSTRIES, CHINO Corporation and RKC Instrument add Japanese temperature-instrument and metrology expertise. Competitive differentiation is increasingly determined by accredited scope, measurement uncertainty, fixed-point

+357 96 030922
info@marketpublishers.com

competence, extreme-temperature coverage, on-site response, instrument and application expertise, digital asset management and customer-specific quality-system support.

Report Scope

This report is a detailed and comprehensive analysis for global UKAS Temperature Calibration Services market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global UKAS Temperature Calibration Services market size and forecasts, in consumption value ($ Million), 2021-2032

Global UKAS Temperature Calibration Services market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global UKAS Temperature Calibration Services market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global UKAS Temperature Calibration Services market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for UKAS Temperature Calibration Services

To forecast future growth in each product and end-use market

+357 96 030922
info@marketpublishers.com

To assess competitive factors affecting the marketplace

This report profiles key players in the global UKAS Temperature Calibration Services market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Trescal, Fortive Corporation, Testo SE & Co. KGaA, NPL Management Ltd, NMi Group, Isothermal Technology Limited, WIKA Group, AMETEK, Inc., Absolute Calibration Limited, Southern Calibration Laboratories Limited, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

UKAS Temperature Calibration Services market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by regions, regional analysis covers

North America (United States, Canada and Mexico)

Europe (Germany, France, UK, Russia, Italy and Rest of Europe)

Asia-Pacific (China, Japan, South Korea, India, Southeast Asia and Rest of Asia-Pacific)

South America (Brazil, Rest of South America)

Middle East & Africa (Turkey, Saudi Arabia, UAE, Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe UKAS Temperature Calibration Services product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of UKAS Temperature Calibration Services, with revenue, gross margin, and global market share of UKAS Temperature Calibration Services from 2021 to 2026.

Chapter 3, the UKAS Temperature Calibration Services competitive situation, revenue, and global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and by Application, with consumption value and growth rate by Type, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026.and UKAS

3 MARKET COMPETITION, BY PLAYERS

+357 96 030922
info@marketpublishers.com

3.1 Global UKAS Temperature Calibration Services Revenue and Share by Players (2021-2026)
3.2 Market Share Analysis (2025)
3.2.1 Market Share of UKAS Temperature Calibration Services by Company Revenue
3.2.2 Top 3 UKAS Temperature Calibration Services Players Market Share in 2025
3.2.3 Top 6 UKAS Temperature Calibration Services Players Market Share in 2025
3.3 UKAS Temperature Calibration Services Market: Overall Company Footprint Analysis
3.3.1 UKAS Temperature Calibration Services Market: Region Footprint
3.3.2 UKAS Temperature Calibration Services Market: Company Product Type Footprint
3.3.3 UKAS Temperature Calibration Services Market: Company Product Application Footprint
3.4 New Market Entrants and Barriers to Market Entry
3.5 Mergers, Acquisition, Agreements, and Collaborations

4 MARKET SIZE SEGMENT BY TYPE

4.1 Global UKAS Temperature Calibration Services Consumption Value and Market Share by Type (2021-2026)
4.2 Global UKAS Temperature Calibration Services Market Forecast by Type (2027-2032)

5 MARKET SIZE SEGMENT BY APPLICATION

5.1 Global UKAS Temperature Calibration Services Consumption Value Market Share by Application (2021-2026)
5.2 Global UKAS Temperature Calibration Services Market Forecast by Application (2027-2032)

6 NORTH AMERICA

6.1 North America UKAS Temperature Calibration Services Consumption Value by Type (2021-2032)
6.2 North America UKAS Temperature Calibration Services Market Size by Application (2021-2032)
6.3 North America UKAS Temperature Calibration Services Market Size by Country
6.3.1 North America UKAS Temperature Calibration Services Consumption Value by

+357 96 030922

Country (2021-2032)
6.3.2 United States UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
6.3.3 Canada UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
6.3.4 Mexico UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

7 EUROPE

7.1 Europe UKAS Temperature Calibration Services Consumption Value by Type (2021-2032)
7.2 Europe UKAS Temperature Calibration Services Consumption Value by Application (2021-2032)
7.3 Europe UKAS Temperature Calibration Services Market Size by Country
7.3.1 Europe UKAS Temperature Calibration Services Consumption Value by Country (2021-2032)
7.3.2 Germany UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
7.3.3 France UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
7.3.4 United Kingdom UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
7.3.5 Russia UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
7.3.6 Italy UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

8 ASIA-PACIFIC

8.1 Asia-Pacific UKAS Temperature Calibration Services Consumption Value by Type (2021-2032)
8.2 Asia-Pacific UKAS Temperature Calibration Services Consumption Value by Application (2021-2032)
8.3 Asia-Pacific UKAS Temperature Calibration Services Market Size by Region
8.3.1 Asia-Pacific UKAS Temperature Calibration Services Consumption Value by Region (2021-2032)
8.3.2 China UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

+357 96 030922
info@marketpublishers.com

8.3.3 Japan UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
8.3.4 South Korea UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
8.3.5 India UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
8.3.6 Southeast Asia UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
8.3.7 Australia UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

9 SOUTH AMERICA

9.1 South America UKAS Temperature Calibration Services Consumption Value by Type (2021-2032)
9.2 South America UKAS Temperature Calibration Services Consumption Value by Application (2021-2032)
9.3 South America UKAS Temperature Calibration Services Market Size by Country
9.3.1 South America UKAS Temperature Calibration Services Consumption Value by Country (2021-2032)
9.3.2 Brazil UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
9.3.3 Argentina UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

10 MIDDLE EAST & AFRICA

10.1 Middle East & Africa UKAS Temperature Calibration Services Consumption Value by Type (2021-2032)
10.2 Middle East & Africa UKAS Temperature Calibration Services Consumption Value by Application (2021-2032)
10.3 Middle East & Africa UKAS Temperature Calibration Services Market Size by Country
10.3.1 Middle East & Africa UKAS Temperature Calibration Services Consumption Value by Country (2021-2032)
10.3.2 Turkey UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)
10.3.3 Saudi Arabia UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

10.3.4 UAE UKAS Temperature Calibration Services Market Size and Forecast (2021-2032)

11 MARKET DYNAMICS

11.1 UKAS Temperature Calibration Services Market Drivers
11.2 UKAS Temperature Calibration Services Market Restraints
11.3 UKAS Temperature Calibration Services Trends Analysis
11.4 Porters Five Forces Analysis
11.4.1 Threat of New Entrants
11.4.2 Bargaining Power of Suppliers
11.4.3 Bargaining Power of Buyers
11.4.4 Threat of Substitutes
11.4.5 Competitive Rivalry

12 INDUSTRY CHAIN ANALYSIS

12.1 UKAS Temperature Calibration Services Industry Chain
12.2 UKAS Temperature Calibration Services Upstream Analysis
12.3 UKAS Temperature Calibration Services Midstream Analysis
12.4 UKAS Temperature Calibration Services Downstream Analysis

13 RESEARCH FINDINGS AND CONCLUSION

I would like to order

Product name: Global UKAS Temperature Calibration Services Market 2026 by Company, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G1B8DF2625E9EN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G1B8DF2625E9EN.html
