According to our (Global Info Research) latest study, the global Ultra Hard Material Cutting (UHMC) Machine market size was valued at USD 1250.4 million in 2023 and is forecast to a readjusted size of USD 2125.7 million by 2030 with a CAGR of 7.9% during review period.

UHMC machines are equipment comprising of electrical discharge machining (EDM) and laser cutting machines, which are used to cut ultra-hard materials (whose hardness value exceeds 40 gigapascals), such as polycrystalline diamond or polycrystalline cubic boron nitride. The manufacturing industry has experienced radical changes in processes that are used for fabricating and engineering products. Earlier, goods were produced manually. Subsequently, with advances in technology, machines were used to build goods.

The rise in automation is one of the primary growth factors for the ultra hard material cutting (UHMC) machine market. Companies are increasingly adopting automation techniques to enhance their productivity, increase their profit margin, and meet anticipated quality standards. Additionally, automation also monitors the manufacturing processes and maintains the quality of products and eliminates the possibility of human error that hampers production quality.
