Abstracts

This report studies the Ultra-High Performance Concrete (UHPC) market. UHPC, or Ultra High Performance Concrete, is a class of concrete defined by its exceptionally high strength and durability. It was developed in Europe in the 1980s for specialized applications that demand superior strength and corrosion resistance – marine anchors, piers and seismic structures. Ultra-high performance concrete (UHPC) is an advanced cementitious-based composite material that offers new opportunities for infrastructure works, building constructions and many niche markets. In the last two decades UHPC has been used for both structural and non-structural precast components in many countries. However, this outstanding technology has struggled to become a mainstream technology for everyday use due to lack of design codes and due to initial high investment costs of manufacturing facilities. Moreover, the high UHPC material cost makes it hard to compete with conventional designs optimized for other materials.

Scope of the Report:

This report focuses on the Ultra-High Performance Concrete (UHPC) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

SIFCON Ultra-High Performance Concrete (UHPC) emerged as the leading product segment in the overall market for Ultra-High Performance Concrete (UHPC) and accounted for 64.46% of total market volume in 2016. RPC (Reactive Powder Concrete) Ultra-High Performance Concrete (UHPC) followed, which accounted for 20.60% of total

market volume in 2016.

Nowadays, North America and Europe account for nearly 70% of the global Ultra-High Performance Concrete (UHPC) production and consumption. Asia Pacific is the most active region in the nearly future because of the drive of downstreams

Growth of the Ultra-High Performance Concrete (UHPC) market is largely associated with the growth in the construction industry. The construction industry is expected to push the concrete industry to new heights, which in turn will help the construction market achieve greater volumes and revenues in the near future; hence this drives the demand for UHPC at a significant pace.

The worldwide market for Ultra-High Performance Concrete (UHPC) is expected to grow at a CAGR of roughly 7.3% over the next five years, will reach 1500 million US\$ in 2023, from 990 million US\$ in 2017, according to a new GIR (Global Info Research) study.
