## Abstracts

The global Ultra-thin Glass market size is expected to reach \$ 4383 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Ultra-thin Glass is a high-end glass, which possesses minimal thickness. It is thinner than a single human hair strand, thus providing advantages over other substrate materials such as plastics, metals, or silicon. It offers superior optical quality, temperature stability, chemical consistency, and mechanical resistance in all applications.

The core manufacturers of Ultra-thin Glass in the world include Corning, AGC and Nippon Electric Glass. The top three companies account for about 78% of the market. North America is the world's largest Ultra-thin Glass market with a market share of about 40%, followed by Japan and China with a market share of 29% and 14%, respectively. In terms of product types, 0.5-1.1mm is the largest segment, accounting for about 45% of the market share, while in terms of applications, Consumer Electronics is the largest downstream area, accounting for about 74% of the market share.

This report studies the global Ultra-thin Glass production, demand, key manufacturers, and key regions.
