According to our (Global Info Research) latest study, the global Ultrafast Laser market size was valued at USD 811.5 million in 2023 and is forecast to a readjusted size of USD 1015.4 million by 2030 with a CAGR of 3.3% during review period.

Ultrafast lasers are ultra-short pulse of light with an electromagnetic pulse whose time duration is of the order of a picosecond or less. These pulses have a broadband optical range, and can be produced by mode-locked oscillators.

Ultrafast lasers are commonly referred to as ultrafast events with an amplification of ultra-short pulses which always requires the technique of high pulse amplification, in order to avoid damage to the gain medium of the amplifier. In research & development department, advances in materials and laser configurations promise to open up a variety of new applications outside of the technology's core area of industrial micromachining.

The major players in global Ultrafast Lasers market include Coherent, Trumpf, IPG Photonics, etc. The top 3 players occupy about 40% shares of the global market. Asia-Pacific is the largest market, with a share about 53%, followed by Europe and North Amer
