Abstracts

The global Ultrafiltration Membrane market size is expected to reach \$ 1797 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Ultrafiltration (UF) is a variety of membrane filtration in which forces like pressure or concentration gradients lead to a separation through a semipermeable membrane. Suspended solids and solutes of high molecular weight are retained in the so-called retentate, while water and low molecular weight solutes pass through the membrane in the permeate (filtrate).

DuPont, Veolia, Litree, Pentair (X-Flow), CITIC Envirotech and Asahi Kasei etc. are now the key producers in the global Ultrafiltration Membrane market. Top 6 took up about 1/2 of the global market.

In terms of product, Inorganic Membrane is the largest segment, with a share over 98%. And in terms of application, the largest application is industrial & municipal, followed by food and beverage, etc.

In recent years, there are several companies in the market whose dynamics are worth noting, such as:

DuPont Water Solutions acquired Inge GmbH in 2020, and then consolidated ultrafiltration technologies under the new IntegraTec™ brand (Inge®, Memcor®, and DuPont Ultrafiltration), and plans to spin off the water tech business in 2026.

In 2021, Microdyn-Nadir was renamed MANN+HUMMEL Water & Fluid Solutions.

In 2022, SUEZ Water Technologies was acquired by Veolia and is still included in the Veolia Water Technologies & Solutions (VWTS) business.

In 2023, Koch Separation Solutions was acquired by Sun Capital Partners and renamed Kovalus Separation Solutions.

3M spun off its health care business in 2023 and became an independent company Solventum.

This report studies the global Ultrafiltration Membrane production, demand, key manufacturers, and key regions.
