Abstracts

The global Ultramarine market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Ultramarine is a deep blue color pigment which was originally made by grinding lapis lazuli into a powder. Its lengthy grinding and washing process makes the natural pigment quite valuable—roughly ten times more expensive than the stone it comes from and as expensive as gold.

This report studies the global Ultramarine production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Ultramarine, and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Ultramarine that contribute to its increasing demand across many markets.
