Abstracts

The global UN Bulk Bag market size is expected to reach \$ 793 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

In 2025, global production of UN bulk bags reached 45 million units, with an estimated average selling price of US\$10.7 per unit. UN FIBCs (Unified Packaging Systems for Dangerous Goods) are flexible, medium-sized bulk containers approved by the United Nations Packaging System for Dangerous Goods for the transport and storage of specific dangerous goods or hazardous solid materials. They are classified as dangerous goods packaging and typically consist of high-strength PP woven fabric, straps, stitching, coating, lining, and necessary anti-static/conductive structures. They must pass performance tests including drop, stacking, top lifting, tipping, righting, tearing, and vibration tests, and must be labeled with the UN packaging symbol, packaging class, maximum gross weight, year of manufacture, country, and certification body as required. Applications are concentrated on hazardous chemicals, pesticide technicals and formulations, combustible dust, metal powders, catalysts, pigments, resins, fine chemical powders, pharmaceutical intermediates, lithium battery materials, contaminated solid waste, and other dry bulk materials requiring transport under dangerous goods regulations. The upstream of the industry chain includes PP resin, PP flat yarn, high-strength suspenders, sewing thread, UV stabilizers, masterbatches, coating materials, PE/aluminum foil/EVOH liners, antistatic agents, conductive yarn/static dissipative yarn, labels, inks, and testing services; the midstream includes drawing, weaving, laminating, cutting, sewing, lining lamination, electrostatic safety design, UN type testing, batch traceability, labeling, and quality document management; the downstream includes chemicals, agrochemicals, pharmaceuticals, mining, lithium battery materials, hazardous waste treatment, hazardous materials warehousing, and international logistics. Gross profit margin is approximately 20%-40%.
