Unbleached Taeda Pine Pulp is a kind of pulp used as a water-absorbing medium, after bleaching, extraction of organic solvent extracts, etc., wood pulp and straw pulp. Used in the production of pulp used as a water-absorbing medium for various hygiene products. Compared with ordinary pulp boards, fluff pulp boards have longer fibers and good fiber strength. When producing fluff pulp products such as sanitary napkins, they are easily dissociated into single fibers on the fluffing machine, and less dust is generated during fluff processing. The general requirements for fluff pulp products are good water absorption and rapid diffusion; the fluff pulp fiber must have high whiteness, soft fiber, certain elasticity and good core pad integrity, and must meet the prescribed hygienic indicators.
