Abstracts

The global Uncooled Infrared Fever Screening Thermographic Detectors market size is expected to reach $ 44.10 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Uncooled infrared fever screening thermographic detectors are infrared thermal imaging detectors, modules, cameras, or systems designed for non-contact screening of elevated human skin temperature. These products typically use uncooled microbolometer focal plane arrays, VOx detectors, amorphous silicon detectors, or thermopile arrays to capture infrared radiation from the human face, and combine radiometric calibration, blackbody reference, face detection, visible-light fusion, and temperature compensation algorithms to identify individuals with potential elevated body temperature. This study focuses on infrared detector cores, thermal imaging modules, thermal cameras, and complete fever screening systems used for human body temperature screening.Prices vary by detector type.

From a supply-side perspective, the infrared body temperature screening detector market has shifted from the surge in demand seen during public health emergencies back to replacement demand from existing installations in healthcare, transportation, public facilities, and key access-control locations. Core suppliers can be divided into two main categories: the first includes companies with complete thermal imaging camera and system capabilities, such as Teledyne FLIR, Dahua, Hikvision, Guide, and DALI; the second includes detector or module suppliers, such as GSTiR, Raytron, Lynred, Heimann, and Excelitas.

From the demand side, future growth is unlikely to repeat the explosive procurement

cycle seen during the pandemic. Instead, demand will mainly come from replacement needs at hospital entrances, border inspection checkpoints, industrial parks, schools, and key public facilities, as well as the integration of thermal temperature screening with security systems, access control, and AI-based facial detection systems. The FDA?s warning about the risks of improper use of thermal imaging systems also indicates that, in medical settings, these products are more suitable as preliminary screening and alert tools, rather than standalone diagnostic devices.

This report studies the global Uncooled Infrared Fever Screening Thermographic Detectors production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Uncooled Infrared Fever Screening Thermographic Detectors and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Uncooled Infrared Fever Screening Thermographic Detectors that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Uncooled Infrared Fever Screening Thermographic Detectors total production and demand, 2021-2032, (K Units)
Global Uncooled Infrared Fever Screening Thermographic Detectors total production value, 2021-2032, (USD Million)
Global Uncooled Infrared Fever Screening Thermographic Detectors production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)
Global Uncooled Infrared Fever Screening Thermographic Detectors consumption by region & country, CAGR, 2021-2032 & (K Units)
U.S. VS China: Uncooled Infrared Fever Screening Thermographic Detectors domestic production, consumption, key domestic manufacturers and share
Global Uncooled Infrared Fever Screening Thermographic Detectors production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)
Global Uncooled Infrared Fever Screening Thermographic Detectors production by Detector Cooling Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)
Global Uncooled Infrared Fever Screening Thermographic Detectors production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Uncooled Infrared Fever Screening Thermographic Detectors market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Teledyne FLIR, Dahua Technology, Hikvision, Guide Sensmart / Guide Infrared, DALI Technology, Global Sensor Technology, InfiRay, Seek Thermal, Lynred, Leonardo DRS, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Uncooled Infrared Fever Screening Thermographic Detectors market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (K Units) and average price (US$/Unit) by manufacturer, by Detector Cooling Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
