Abstracts

The global Underarm Spray market size is expected to reach \$ 1542 million by 2032, rising at a market growth of 2.2% CAGR during the forecast period (2026-2032).

Global production of underarm sprays is projected to reach 100 million units by 2025, with an average selling price of approximately \$12 per unit.

Underarm sprays are personal care products used to locally suppress sweat secretion, reduce odor, or mask body odor. They work by being sprayed onto the skin under the armpits. Their core ingredients include antiperspirants (such as aluminum chloride and aluminum hydroxychloride), antibacterial agents (such as triclosan), and fragrances. Some products also contain plant extracts or gentle care ingredients, suitable for daily cleaning and care, quick drying after exercise, or immediate needs in special occasions (such as business meetings or social events). The upstream of the industry chain consists of raw material suppliers (providing antiperspirants, fragrances, and packaging materials), the midstream consists of brand owners and contract manufacturers, and the downstream reaches consumers through supermarkets, e-commerce platforms, and pharmacies. Online channels account for over 60% of sales, with live-streaming e-commerce and social media marketing becoming core drivers of brand growth.

Market drivers mainly include the following:

Increased health awareness and consumption upgrade. With the public's increasing emphasis on personal hygiene and body odor management, underarm sprays have upgraded from 'optional consumer goods' to 'daily necessities.' The younger generation, pursuing a 'refined lifestyle,' places higher demands on product efficacy (such as 72-hour long-lasting antiperspirant), ingredient safety (such as aluminum-free formulas), and user experience (such as fine mist droplet texture), driving brands to continuously iterate their technologies. For example, some products utilize micro-molecular penetration technology, allowing antiperspirant ingredients to reach the root of the sweat glands directly, reducing skin irritation.

Scenario Segmentation and Product Innovation: The increasing popularity of sports and fitness, outdoor travel, and other scenarios has spurred specialized demands. Sports sprays need to possess 'powerful antiperspirant + rapid absorption' characteristics to avoid sweat residue; business scenarios emphasize 'fragrance-free or lightly scented' to avoid conflict with perfumes. Furthermore, the growing number of people with sensitive skin has prompted brands to launch 'alcohol-free, fragrance-free, and hormone-free' formulas, passing dermatological low-irritation tests to broaden their user base.

The Dual Empowerment of Online Channels and Social Marketing: The convenience of e-commerce platforms (such as JD.com and Tmall) lowers the consumption threshold, while live-streaming sales and short video reviews accelerate product discovery. Brands build trust through KOL collaborations and word-of-mouth marketing. For example, a domestic spray achieved monthly sales exceeding 100,000 bottles thanks to a review video demonstrating that it remained odorless for 72 hours under high temperatures. Meanwhile, customized services (such as product recommendations based on skin type) and membership systems enhance user loyalty, driving repurchase rates to over 60%.

This report studies the global Underarm Spray production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Underarm Spray and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Underarm Spray that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Underarm Spray total production and demand, 2021-2032, (K Units)

Global Underarm Spray total production value, 2021-2032, (USD Million)

Global Underarm Spray production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Underarm Spray consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Underarm Spray domestic production, consumption, key domestic manufacturers and share

Global Underarm Spray production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Underarm Spray production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Underarm Spray production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Underarm Spray market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Unilever, P&G, Shiseido, Beiersdorf, Mentholatum, Adidas, Kao, Natura &Co, Kao, LVMH, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Underarm Spray market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
