According to our (Global Info Research) latest study, the global Underbars Refrigeration market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Underbars refrigerators are designed for bottled alcoholic beverages and are mostly used in the front-of-the-house bar area. Underbars refrigerators have multiple configurations including one to four doors, drawers, or slide tops.

The demand for chilled beverages is one of the primary growth factors for this market. IT has been observed that the underbars refrigeration market is directly proportional to the growth of the alcoholic beverage industry. During the following few years, countries in the APAC, especially for China and India are estimated to witness a rapid growth in the demand for alcoholic drinks. Also, there is an increasing preference of people across the world towards consuming alcoholic drinks at social gatherings and the increased spending in pubs and lounges. This may boost the demand for alcoholic beverages and increase the demand for underbars refrigeration equipment.
