Abstracts

The global Underwater Fish Gathering Lamp market size is expected to reach \$ 136 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

Underwater Fish Gathering Lamp are specialized submersible lighting devices used in freshwater, seawater, docks, fishing vessels, aquaculture environments and deep-drop fishing applications. They create controlled underwater light fields or localized illumination zones to attract plankton, baitfish, squid, shrimp and target fish species, thereby improving aggregation, catch efficiency, observation and behavioral control. Typical products use LED, HID, metal halide or halogen light sources, with LED becoming the dominant technology route due to energy efficiency, spectral control, lower voltage operation and longer service life. A typical unit consists of a sealed housing, transparent lens or tube, heat-dissipation structure, waterproof cable, power supply, dimming or color control module, and a mounting method such as hanging, bottom placement, dock mounting or line deployment. Key specifications include wattage, luminous flux, wavelength, waterproof rating, depth rating, salt-fog resistance, beam angle, 360-degree illumination, thermal management, operating life and maintenance requirements.

Based on our research, Underwater fish gathering lamp represent a small but highly fragmented specialty market rather than a conventional lighting market. The product logic is built around phototaxis and the formation of underwater light fields that attract plankton, baitfish, squid, shrimp and game fish. Under the narrow scope used in this report, the market includes submersible devices and systems used for fish attraction, night fishing, deep-drop fishing, dock fishing, commercial fishing and selected aquaculture applications. It excludes above-water fishing lamps, decorative yacht

underwater lights without a fish-attraction positioning, pool lights, generic underwater work lights and pure distribution revenue. The industry also uses highly fragmented terminology: North American suppliers usually refer to underwater fishing lights, green fishing lights or dock fishing lights; Japanese suppliers use LED underwater fish-attracting light terminology; Chinese exporters often use LED underwater fishing light, underwater squid fishing light or submersible fishing light.

Demand growth comes from several niche applications rather than one large end market. Commercial applications include squid fishing, saury fishing, purse seine, falling-net, deep-drop fishing and selected aquaculture lighting. Recreational applications include dock fishing, lakefront and coastal residential use, boat fishing, shrimping, crappie fishing, snook fishing and swordfish deep-drop setups. LED replacement remains the most important upgrade theme because it reduces power and fuel consumption, improves safety through low-voltage operation, allows better spectral control and supports smaller portable product formats. However, pricing pressure from cross-border low-cost brands is likely to keep the entry-level segment competitive, while high-power commercial systems, saltwater-resistant dock lights and deep-water products should retain higher average selling prices.

From a technology perspective, the competitive focus is moving from basic waterproof illumination toward spectrum effectiveness, depth rating, corrosion resistance, thermal management, modular repairability, low-voltage safety and long-duration reliability. Premium suppliers emphasize patented housings, aluminum or polycarbonate structures, IP68 protection, 360-degree light distribution, dimming, color control, serviceability and anti-fouling considerations. The main substitution risk comes from above-water green floodlights in dock applications, because they reduce underwater maintenance and biofouling. Nevertheless, submersible lights remain structurally relevant in deep-drop fishing, direct underwater attraction, commercial fishing and applications where underwater visual effect is part of the value proposition.

This report studies the global Underwater Fish Gathering Lamp production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Underwater Fish Gathering Lamp and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Underwater Fish Gathering Lamp that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Underwater Fish Gathering Lamp total production and demand, 2021-2032, (K Units)

Global Underwater Fish Gathering Lamp total production value, 2021-2032, (USD Million)

Global Underwater Fish Gathering Lamp production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Underwater Fish Gathering Lamp consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Underwater Fish Gathering Lamp domestic production, consumption, key domestic manufacturers and share

Global Underwater Fish Gathering Lamp production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Underwater Fish Gathering Lamp production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Underwater Fish Gathering Lamp production by Sale Channel, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Underwater Fish Gathering Lamp market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Lianyungang Zhufeng Jinhong Marine Technology Co., Ltd., Shenzhen Liksea Electronics Co., Ltd., Takuyo Riken Co., Ltd., HydroGlow, Inc., Fishing Lights Etc., LLC, Deep Glow Technologies, Outrigger Outdoors, Incredible Underwater LED Lighting, Inc., Green Monster Fishing Light, Hikari Denki LED System Co., Ltd., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Underwater Fish Gathering Lamp market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Sale Channel. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the

forecast year.
