Unibet beam expander is an optical element used to expand the laser beam. It can increase or decrease the diameter of the laser beam, thereby changing the divergence angle and power density of the laser. Unibet beam expanders are available in a variety of models and specifications, suitable for different wavelengths and applications. The advantages of the Unibet beam expander are small size, spherical aberration correction, large input beam diameter, and strong adaptability. The principle of Unibet beam expander is to use aspherical lenses or mirrors to amplify or reduce the laser beam.
