According to our (Global Info Research) latest study, the global Unidirectional DC TVS Diodes market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The forward characteristics of unidirectional DC TVS diodes are the same as those of ordinary Zener diodes, and the hard breakdown at the inflection point of reverse breakdown is approximately 'right angle' is a typical PN junction avalanche. When there is an instantaneous overvoltage pulse, the current of the device increases sharply and the reverse voltage rises to the clamping voltage value and remains at this level.
