## Abstracts

According to our (Global Info Research) latest study, the global Unified Endpoint Management Tool market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Unified endpoint management (UEM) tools combine the management of multiple endpoint types in a single console. UEM tools perform the following functions: • Configure, manage and monitor iOS, Android, Windows 10 and macOS, and manage some Internet of Things (IoT) and wearable endpoints. • Unify the application of configurations, management profiles, device compliance and data protection. • Provide a single view of multidevice users, enhancing efficacy of end-user support and gathering detailed workplace analytics. • Act as a coordination point to orchestrate the activities of related endpoint technologies such as identity services and security infrastructure. Vendors in this market fall into two categories: those that are heavily invested in mobile and modern management with very little client management tool (CMT) functionality, and those that have integrated an existing CMT or explicitly built CMT features into their UEM.
