## Abstracts

The global Unified Threat Management (UTM) Devices market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The basic functions that a UTM security gateway should have include network firewall, network intrusion detection/prevention, VPN and gateway anti-virus. These functions do not have to be used at the same time, but they should be inherent functions of the UTM device itself. UTM security gateways may also include other features, such as content filtering, security auditing, security management, logging, quality of service (QoS), high availability (HA), and bandwidth management. Against the background of increasing demand for global border defense, the scale of global unified threat management products will reach US\$17.2 billion in 2022, and is expected to reach US\$23.6 billion by 2026, with a compound annual growth rate (CAGR) of more than 9% during the five-year forecast period. . Among them, by 2026, the scale of China's unified threat management products is expected to reach US\$6.6 billion, with a compound annual growth rate (CAGR) of more than 17% during the five-year forecast period, leading the world in growth rate.
