## Abstracts

According to our (Global Info Research) latest study, the global Uninterrupted Power Supply System market size was valued at US\$ 13450 million in 2024 and is forecast to a readjusted size of USD 17650 million by 2031 with a CAGR of 4.0% during review period.

Uninterrupted Power Supply (UPS) is an electrical System that provides emergency power to a load when the input power source fails. Uninterrupted Power Supply (UPS) converts incoming AC to DC through a rectifier, and converts it back with an inverter. Uninterrupted Power Supply (UPS) differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries, supercapacitor, or flywheels. The on-battery runtime of most uninterruptible power sources is relatively short (only a few minutes) but sufficient to start a standby power source or properly shut down the protected equipment.

The major players in global Uninterrupted Power Supply (UPS) market include CyberPower, Schneider-Electric, EATON, etc. The top 3 players occupy about 30% shares of the global market. North America and China are main markets, they occupy about 50% of the global market. 100-500 kVA is the main type, with a share about 50%. Data Center and Telecommunication industry are main applications, which hold a share over 50%.
