The global Unshielded Multi-core Cable market size is expected to reach \$ 4087 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

In 2025, global Unshielded Multi-core Cable production reached approximately 632k kilometers , with an average global market price of around US\$4 per meter.

Unshielded multi-core cable refers to a cable product composed of two or more insulated conductors twisted or arranged together under an outer jacket, without dedicated shielding structures such as metallic braid, aluminum foil, copper tape, or metallic sheath. Its main function is to transmit multiple power lines, control signals, equipment connections, or instrumentation circuits within a single cable. It is widely used in industrial equipment, automation control cabinets, building electrical systems, household appliances, lighting systems, instrumentation, machinery, robot peripherals, and general low-voltage connection applications. Compared with shielded multi-core cables, unshielded multi-core cables have a simpler structure, lower cost, better flexibility, and easier installation and termination. They are suitable for environments with relatively low electromagnetic interference or less demanding signal accuracy. However, in applications involving inverters, high-power motors, high-frequency communication, or strong EMI, their interference resistance is limited, and proper routing, grounding isolation, or shielded cables may be required to improve system stability.

The upstream of the unshielded multi-core cable industry chain mainly includes conductor materials such as copper rod, aluminum rod, and tinned copper wire; insulation and jacket materials such as PVC, PE, XLPE, LSZH, PUR, TPE, rubber, and

silicone rubber; as well as flame retardants, plasticizers, fillers, talc powder, color masterbatch, packaging materials, and extrusion/stranding equipment. Among these, copper, aluminum, and polymer materials have a significant impact on product cost, flexibility, flame retardancy, and service life. Representative upstream companies include Freeport-McMoRan, BHP, Rio Tinto, Jiangxi Copper, Aurubis, Dow, BASF, LyondellBasell, SABIC, and Wacker Chemie. The midstream consists of cable manufacturers responsible for wire drawing, annealing, stranding, insulation extrusion, core identification, cabling, filling, jacket extrusion, marking, testing, and packaging. Representative companies include Norden Communication, CommScope, and EIS Wire & Cable. Downstream applications mainly include industrial automation, machinery, building electrical systems, energy equipment, rail transit, home appliances, instrumentation, lighting, security systems, and communication infrastructure. Typical end users include Siemens, ABB, Schneider Electric, Rockwell Automation, Honeywell, Bosch, Foxconn, Tesla, BYD, Hitachi, and Mitsubishi Electric. Overall, the industry chain is characterized by “upstream metals and polymer materials determining cost and basic performance, midstream cabling and extrusion processes determining safety and reliability, and downstream demand from automation, construction, and equipment manufacturing driving procurement.”

The unshielded multi-core cable market is mature but supported by stable demand from industrial automation, machinery, electrical control cabinets, building electrical systems, home appliances, and general equipment connections. Competition has gradually shifted from pure price competition toward flexibility, flame-retardant performance, oil and abrasion resistance, environmentally friendly materials, certification systems, and delivery stability. Looking ahead, ordinary PVC multi-core cables will continue to meet basic demand, while growth will increasingly shift toward high-flexibility, LSZH, high/low-temperature-resistant, oil-resistant, abrasion-resistant, and automation-oriented mid- to high-end products. At the same time, demand for VDE, UL, CSA, and other certified cables from smart manufacturing, robotics, rail transit, new energy equipment, and export-oriented machinery will drive product upgrading. Key drivers include manufacturing automation upgrades, higher equipment electrification, smart building and energy infrastructure development, and end users' focus on wiring efficiency and system reliability. Restraints include cost pressure from copper price volatility, homogenized competition in low-end markets, substitution by shielded cables in high-interference environments, partial replacement by wireless communication and integrated modules in some low-end connections, and rising manufacturing costs caused by stricter environmental and flame-retardant standards. Overall, unshielded multi-core cables are unlikely to experience explosive growth, but their broad applicability, moderate cost, and ease of installation will support stable demand in

industrial equipment, building wiring, and general electrical connections, while the market continues to upgrade toward higher performance, certification, and customization.

This report studies the global Unshielded Multi-core Cable production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Unshielded Multi-core Cable and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Unshielded Multi-core Cable that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Unshielded Multi-core Cable total production and demand, 2021-2032, (Km)

Global Unshielded Multi-core Cable total production value, 2021-2032, (USD Million)

Global Unshielded Multi-core Cable production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Km), (based on production site)

Global Unshielded Multi-core Cable consumption by region & country, CAGR, 2021-2032 & (Km)

U.S. VS China: Unshielded Multi-core Cable domestic production, consumption, key domestic manufacturers and share

Global Unshielded Multi-core Cable production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Km)

Global Unshielded Multi-core Cable production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Km)

Global Unshielded Multi-core Cable production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Km)

This report profiles key players in the global Unshielded Multi-core Cable market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Norden Communication, Coroflex, Caledonian, American Wire Group, EIS Wire & Cable, Radix Wire & Cable, Standard Wire & Cable, Dielectric Sciences, Carr Manufacturing, Brim Electronics, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Unshielded Multi-core Cable market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Km) and average price (US\$/Meter) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global Unshielded Multi-core Cable market?
2. What is the demand of the global Unshielded Multi-core Cable market?
3. What is the year over year growth of the global Unshielded Multi-core Cable market?
4. What is the production and production value of the global Unshielded Multi-core Cable market?
5. Who are the key producers in the global Unshielded Multi-core Cable market?
6. What are the growth factors driving the market demand?
