Abstracts

The global Unsweetened Soy Milk market size is expected to reach \$ 2176 million by 2032, rising at a market growth of 5.5% CAGR during the forecast period (2026-2032).

In 2025, global production of sugar-free soy milk reached 2.0319 million tons, with an average selling price of US\$720 per ton. Global annual production capacity for sugar-free soy milk is approximately 3 million tons, with a gross profit margin of about 20.6%. Sugar-free soy milk is a plant-based protein beverage made primarily from soybeans. It is produced through processes such as soaking, grinding, boiling, and homogenization, without added sugar, preserving the natural flavor and nutrients of the soybeans. Its characteristics include low calories, high protein (approximately 3-4g/100ml), and rich in isoflavones, dietary fiber, and unsaturated fatty acids, making it suitable for lactose intolerant individuals, diabetics, or those seeking a low-sugar diet. It can be consumed directly as a milk substitute and can also be used in food processing such as coffee and baking. The upstream of the sugar-free soy milk industry includes soybeans, sweeteners, and packaging materials. The midstream consists of sugar-free soy milk manufacturers, and the downstream mainly involves online and offline sales.

The sugar-free soy milk market has experienced rapid growth in recent years. With increasing consumer health awareness, the demand for low-sugar, low-fat, and high-protein beverages has risen. Sugar-free soy milk, due to its natural and additive-free characteristics, is favored by fitness enthusiasts, diabetics, and those pursuing a healthy lifestyle. On the supply side, traditional soy milk brands such as Vitasoy and VIVIL have launched sugar-free product lines, while emerging brands are improving taste and reducing the beany flavor through innovative processes (such as steaming technology), enriching their product range. In terms of sales channels, sugar-free soy milk not only covers traditional supermarkets and convenience stores but is also rapidly

expanding through e-commerce, live-streaming e-commerce, and community group buying, meeting consumer needs in different scenarios. Overall, the sugar-free soy milk market is in a growth phase, with intensified brand competition and products moving towards functional and personalized features. It is expected to capture a larger share of the healthy beverage market in the future.
