The global Upcycled Citrus Peel Fiber Concentrates market size is expected to reach \$ 222 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

Upcycled Citrus Peel Fiber Concentrates are food grade, functional fibers derived from the byproducts of the citrus juice industry. Instead of discarding the peel, it is processed to extract both soluble and insoluble dietary fibers. In 2025, global upcycled citrus peel fiber concentrates production reached approximately 38,513 ton, with an average global market price of around USD 3,800 per ton. A factory gross profit of USD 1,064 per ton with 28% gross margin. A single line full machine capacity production is around 250 ton per line per year. downstream demand is concentrated in food and beverage, animal feed and nutraceuticals. A plant-based meat producer uses citrus fiber concentrate to replace methylcellulose, improve water retention and reduce fat content. China leads the growth, driven by a strong citrus processing base, rapid expansion of clean label foods, and government support for sustainability. Brazil also leads as the largest orange producer, while US is following driven by high demand for a clean label and plant based foods.
