Abstracts

The global Upcycled Food Products market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Food waste is a complex issue that affects every aspect of our food system. According to ReFED, over 35 million tons of food are wasted every year, costing our economy over \$218 billion. This waste also has a significant environmental impact, accounting for approximately 8% of global greenhouse gas emissions. Inefficiencies in the supply chain contribute up to 10% of food waste. Improving planning, tracking, and collaboration across the supply chain can help reduce this waste. Another key driver of food waste is consumer behavior. It's estimated that up to 20% of food is wasted at the consumer level, due to factors such as overbuying, improper storage, and confusion over expiration dates. Addressing these issues through education and awareness campaigns, as well as improved labeling and packaging, can help to reduce food waste at the consumer level.

Upcycled food is a solution to food waste that is gaining momentum. By transforming food byproducts, surplus, and scraps into nutritious and tasty products, upcycling reduces waste, saves resources, and promotes a more sustainable food system.

This report studies the global Upcycled Food Products demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Upcycled Food Products, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Upcycled Food Products that

contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Upcycled Food Products total market, 2018-2029, (USD Million)

Global Upcycled Food Products total market by region & country, CAGR, 2018-2029, (USD Million)

U.S. VS China: Upcycled Food Products total market, key domestic companies and share, (USD Million)

Global Upcycled Food Products revenue by player and market share 2018-2023, (USD Million)

Global Upcycled Food Products total market by Type, CAGR, 2018-2029, (USD Million)
