An upright vacuum cleaner is a vacuum cleaner that is pushed in front of the person operating it. It is a single cleaning unit that includes a large cleaning head, a large attached dust bin, a long handle and an attachable wand for cleaning upholstery and small spaces. Upright vacuums contain a motor that creates airflow and a rotating brush that lifts dirt off the floor. The air flows from the cleaning head through the vacuum cleaner into the bag and out the exhaust port. The suction created by this airflow sucks up dirt and debris.
