Abstracts

Urinary incontinence slings are flexible surgical mesh systems that are placed surgically to restore the urethra to its normal position and efficiently minimize incontinence. A sling procedure uses strips of the body's tissue or synthetic mesh to create a hammock-like fixture that wraps around the bladder neck and a tube that transports urine from the bladder. Urinary incontinence slings are also called urethral support slings.

SCOPE OF THE REPORT:

This report studies the Urinary Slings market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Urinary Slings market by product type and applications/end industries.

The rising medical tourism initiatives on a global level is estimated to drive the growth prospects for the global urinary slings market until the end of 2023. It has been observed that governments around the world are increasingly taking medical tourism initiatives in the healthcare sector focusing key treatment areas such as cancer, cardiovascular, and bladder disorders. Also, medical tourism available for chronic diseases such as kidney diseases that require early diagnosis and treatment will boost the consumption of urinary incontinence products like urinary slings. Costa Rica, Mexico, Singapore, India, Taiwan, Israel, Malaysia, South Korea, Thailand, and Turkey are some of the countries that are popular for medical tourism initiatives offering cost-effective treatment for cancer and other chronic diseases including bladder disorders. Moreover, APAC is the region that has the highest number of countries with medical tourism initiatives in countries such as India and China.

The Americas accounted for the majority market share during 2017 and continue to dominate the market during the forecasted period. Some of the major factors

responsible for the growing demand for incontinence care products such as urinary slings is the increasing life expectancy of people and the rising number of aging baby boomer population in the Americas.

The global Urinary Slings market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Urinary Slings.
