Abstracts

The global Urokinase market size is expected to reach \$ 65 million by 2029, rising at a market growth of 5.0% CAGR during the forecast period (2023-2029).

Global key players of urokinase include Syner-Med, LIVZON, Wanhua Biochem, etc. The top three players hold a share about 50%. China is the largest market of Urokinase, holding a share about 56%, followed by Europe and North America.

Urokinase, also known as urokinase-type plasminogen activator (uPA), is a serine protease present in humans and other animals. The human urokinase protein was discovered, but not named, by McFarlane and Pilling in 1947. Urokinase was originally isolated from human urine, and it is also present in the blood and in the extracellular matrix of many tissues. The primary physiological substrate of this enzyme is plasminogen, which is an inactive form (zymogen) of the serine protease plasmin.

This report studies the global Urokinase production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Urokinase, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
