According to our (Global Info Research) latest study, the global USB Ethernet Bridge market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

USB Ethernet Bridge, also known as a USB to Ethernet Adapter or Converter, is a device that allows a computer or other USB-enabled device to connect to a network through an Ethernet cable. It bridges the communication between the USB interface and the Ethernet network, enabling the device to access the internet or communicate with other devices on the network as if it were equipped with a built-in Ethernet port. This type of adapter is particularly useful for devices that lack an Ethernet port but have a USB port, such as laptops, tablets, or smartphones, and can also be used to extend the network connectivity of a desktop computer.
