UV-detection Stickers are designed to detect the intensity of ultraviolet (UV) radiation and remind users to reapply sunscreen. These stickers are typically sensitive to UV light and undergo a color change or display a specific pattern when exposed to sufficient levels of UV radiation, indicating that the current environment has high UV intensity and that protective measures, such as reapplying sunscreen, are necessary. UV-detection Stickers are particularly useful during outdoor activities, such as beach vacations and sports, as they help users effectively prevent UV damage.
