According to our (Global Info Research) latest study, the global UV Mapping Software market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

In 3D modeling, UV mapping is the process of mapping a 2D image onto the surface of a 3D model. This process involves unfolding each 3D model face into a 2D plane so that texture, color, and other effects can be applied to the model's surface. UV Mapping Software provides various UV mapping tools and techniques, such as automatic UV unfolding, manual UV unfolding, projection mapping, cloth mapping, etc. They also provide various texture and material libraries to help users achieve realistic material effects.
