A UV offset printing blanket is a type of blanket specifically used in the UV printing process within offset printing. Offset printing is an indirect printing method where ink is first transferred from the printing plate to the blanket and then from the blanket to the substrate. The UV offset printing blanket plays a crucial intermediary role in this process and is especially suitable for the transfer of UV inks. UV inks are a type of ink that can be rapidly cured through ultraviolet irradiation, which requires the UV offset printing blanket to work well with this special type of ink to achieve high - quality printing results.
