## Abstracts

The global V2G Bidirectional Charging Pile market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

V2G stands for Vehicle-to-Grid, which uses the unique energy storage function of electric vehicles to interact with the grid in two directions. Its core idea is to use a large number of energy storage devices of electric vehicles as a buffer for the grid and renewable energy. When the grid load is too high, the energy storage battery of the electric vehicle provides reverse power to the grid. When the grid load is low, the energy storage battery can store the grid's excess power generation and reduce waste.
