Abstracts

The global Vacant Property Security Service market size is expected to reach \$ 1691 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

Vacant Property Security Service refers to a set of security solutions specifically designed to protect unoccupied or vacant properties from potential risks such as theft, vandalism, squatting, and other forms of damage. Vacant properties are often targets for criminal activity because they lack regular human presence, making them more vulnerable to security threats.

When properties become vacant, they become an easy target for unwanted trespassers like squatters and vandals. Even seemingly innocent visits from those with less malicious intentions such as urban explorers can cause damage to a property and leave with an unwanted repair bill.

Vacant properties are a popular and frequent target for criminals. Threats including anti-social behaviour, arson, fly-tipping, trespassing and even squatting are costly to remedy. And without the right protection in place, valuable assets are at risk day and night.

Most insurers require at least one visit per week to a vacant property as a policy requirement. A physical visit also ensures problems such as damp, pipe bursts or even perimeter damage can be rectified quickly.

As the number of vacant properties grows, especially in urban areas experiencing economic decline or population shifts, the demand for comprehensive security services

is increasing. This includes not just physical security but also advanced monitoring solutions, like AI-based surveillance systems, remote monitoring, and automated alarms. Service providers who can offer integrated, tech-driven solutions (e.g., smart cameras, drones, motion sensors) and tailor these to specific needs will have a competitive edge in the market.

Vacant property owners often face tight budgets, especially in regions with high vacancy rates. Offering cost-effective solutions that scale based on the property's size and duration of vacancy will be crucial for service providers.

The market is becoming more competitive, with both established companies and startups entering the field. To differentiate themselves, companies must focus on providing personalized services. The global key companies of Vacant Property Security Service include Orbis Protect, Clearway, Live-in Guardians, The VPS Group, Ad Hoc, Triton Security & Facilities Management, The Keyholding Company, Prime Secure Systems, Eagle Security Services, Secure Site (UK) Limited, Unparalleled Security, and Marpol Security, etc. In 2024, the global top five players had 20.25% share in terms of revenue.

The vacant property security service market differs across regions, with technology adoption, regulatory frameworks, and crime rates playing key roles in shaping market characteristics. Developed markets tend to lean towards advanced tech solutions, while developing regions may prioritize more traditional security measures. Europe and North America are the two largest market regions in the world. The Europe market for Vacant Property Security Service was valued at \$ 517.07 million in 2024 and is anticipated to reach \$ 814.43 million by 2031, at a CAGR of 6.90% during the forecast period of 2025 through 2031. The North America market for Vacant Property Security Service was valued at \$ 358.44 million in 2024 and is anticipated to reach \$ 543.94 million by 2031, at a CAGR of 6.36% during the forecast period of 2025 through 2031.
