Abstracts

According to our (Global Info Research) latest study, the global Vacation Rentals market size was valued at US\$ 104634 million in 2025 and is forecast to a readjusted size of US\$ 135553 million by 2032 with a CAGR of 3.6% during review period.

Vacation rentals refer to furnished residential or non-hotel accommodation units offered by individual owners, professional operators or online platforms for daily, weekly or other short-stay use by leisure travelers, business travelers, families and remote workers. Typical formats include entire apartments, houses, villas, holiday homes, cabins, beach properties, urban homestays, serviced residences and selected boutique short-stay properties. The service is generally delivered through online marketplaces, professional property managers or destination operators that integrate listing display, booking, payment, check-in management and guest reviews. Major supply regions include the United States, Europe, China, Japan, Southeast Asia, Australia and leading island or resort destinations, while use cases cover leisure vacations, family trips, group travel, weekend getaways, event and exhibition stays, workations and flexible medium-term accommodation.

The global vacation rental market is moving from platform-led expansion toward professionalization, compliance and experience-led upgrading. Rising consumer preference for privacy, family and group travel, immersive destination experiences and flexible stay lengths has made vacation rentals a stable complement to hotels. The growing maturity of online booking platforms, mobile payments, dynamic pricing, smart locks, remote customer service and standardized cleaning and maintenance is improving operating efficiency and traveler trust. Europe and North America remain important revenue bases and premium supply centers, while China, Japan, Southeast Asia and India are benefiting from domestic tourism, cross-border recovery, middle-

class consumption and mobile internet penetration. Event travel, festivals, exhibitions, ski trips, beach holidays, countryside escapes and drive-to leisure demand also allow vacation rentals to absorb overflow demand when hotel supply is tight or hotel rates rise.

Key challenges include tighter regulation, housing-supply concerns, tax compliance, neighborhood noise and safety responsibilities, platform commission pressure and uneven listing quality. Some cities in Europe and North America have strengthened registration, data-sharing, operating-day limits and tax rules, pushing the industry from fragmented individual hosting toward professional operators, branded management and compliant asset portfolios. On the demand side, family travel, group stays, pet-friendly properties, remote-work stays, extended leisure trips and premium villas continue to expand, while guests increasingly expect both home-like space and hotel-grade service standards. Future competition will depend less on listing volume alone and more on compliance capability, destination coverage, price management, cleaning and maintenance, customer service, direct-booking capability and differentiated experience design, giving platforms and operators with scalable operations and localized service capabilities a stronger long-term position.
