Abstracts

Vacuum interrupters are electronic devices used to cut out current arc to avoid accidents and equipment damages. Vacuum interrupters are installed in switchgear, circuit breakers, load break switches, and in several other devices for interrupting and extinguishing the electric current arc. These are one of the key components in semiconductor devices.

SCOPE OF THE REPORT:

This report focuses on the Vacuum Interrupters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Asia-Pacific leads the vacuum interrupter market globally with the biggest market share and is expected to grow with a high CAGR among the other regions. This growth is attributed to the growing industrialization and urbanization in the market. There is also a good scope for utilities sector in developed regions like North America and Europe, owing to grid modernization and replacement market for its aging power infrastructure. Oil & Gas are second most growing application for vacuum interrupters as there is growth in exploration and production activities around the globe. The end-users mining and transportation have a considerable combined share in the market.

The worldwide market for Vacuum Interrupters is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
