Vacuum sealing machine for soft pack battery refers to a specialized equipment used in the manufacturing process of soft pack batteries. It is designed to create a vacuum-sealed environment for the battery cell or pack, ensuring airtightness and preventing any leakage of gases or electrolytes. Soft pack batteries, also known as pouch batteries, are a type of rechargeable battery that consists of a flexible pouch or bag-like structure instead of a rigid casing. The vacuum sealing process is crucial for soft pack batteries as it helps maintain the integrity of the battery and improves safety by minimizing the risk of gas expansion or electrolyte leakage. The vacuum sealing machine typically consists of a chamber or enclosure where the battery is placed, and a vacuum pump that removes air and creates a vacuum inside the chamber. Once the desired vacuum level is achieved, the machine seals the pouch securely to maintain the vacuum environment.
